# **ROE DEER MEASUREMENT PARAMETERS 10 AND 11**

*Amendment decision*

## INTRODUCTION:

There's a contradiction between the general CIC measurement rules and the current roe deer MP 10 and 11 measurements.

- The general rules require 0,5 points accuracy
- The current MP 10-11 gives the score with 0,25 points accuracy

## TED DECISION:

- ~~1. Amend the general rules and allow 0,25 point accuracy only for the roe deer MP 10-11~~
2. Amend the MP 10-11 tables for 0,5 point accuracy (rounding in the direction, which results in higher score)

## OPTION 2 – TABLE UPDATE:

tab. CE12-7: Additions for length of tines

Length of tines		Points
Medium	2,50 - 5,00 cm	0
Long	5,00 cm <	0,5

tab. CE12-8: Deductions for length of tines

Length of tines		Points
Medium	2,50 - 5,00 cm	0
Short or missing	< 2,50 cm	-0,5
